

JSW Cement increases production capacity of Vijayanagar plant

Ballari: JSW Cement Ltd has increased its production capacity from current 1.0 MTPA to 3.4 MTPA. The additional capacity will help the firm to strengthen its distribution network in high demand potential areas throughout south India, stated a release from JSW Cement. JSW Cement is part of the \$11 billion JSW Group with interests in steel, energy and infrastructure. The new facility was inaugurated by Savitri Jindal, wife of late O P Jindal, along with industrialist Kailash Kanoria and JSW Group chairman and MD Sajjan Jindal. The capacity is increased to further strengthen its position in the cement industry, especially in Karnataka and Kerala. The plant has multiple systems to control air and dust pollution. It will use roller press technology in finish mode for grinding slag and cement high energy efficient. Anil Kumar Pillai, director and CEO JSW Cement, said JSW Cement is one of the fastest growing cement companies in India.
