

SLAG SAND

An Eco-friendly Fine Aggregate That
Strengthens Your Construction

Sand is the backbone of the construction industry and has become a problematic resource to procure in India. Availability and inferior quality have both contributed to the price volatility resulting in illegal mining by the sand mafias. River Sand is controlled by the government in many southern states.

Sand plays a vital role in enhancing the strength, setting, and bulking of the concrete & mortar. It is a perfect raw material that is easy to find and an excellent matrix to fill in pores. Perfectly filling of pores is important as it helps in increasing the density of the structure thus improving the strength and durability.

JSW Cement
The Leaders' Choice

ABOUT **JSW** Cement

JSW Cement is India's leading 'Green Cement' manufacturer and is part of the JSW Group. We have a strong commitment towards innovation in sustainability & technology to offer eco-friendly construction & building solutions to our customers. Growing exponentially since our inception in 2009, we have reached a production capacity of 14 MTPA (Million Tonnes Per Annum).

We envision a self-reliant India by boosting our colossal infrastructure and fast-growing economy through benchmark projects.

We cater to 11 major states in India across the eastern, western, and southern parts of the country.

JSW Cement emerged in the market as a leader in environmentally friendly product Pozzolona Slag Cement (PSC). Since then, we have expanded our cement range to Concreel HD (CHD), Comp Cem (Composite Cement – PCC)

JSW Cement also extends its services through its construction products in categories like and Ground Granulated Blast Furnace Slag [GGBS} and Slag Sand for the use in concrete and other civil works. The latest introduction to this is the range of construction chemical products with its Drymix mortar range – Enduroplast, Duraflor, Krysta Leakproof being launched in South.

JSW is now being recognized as a holistic group for construction with Steel, Cement, Paints, and Construction Chemicals foray to the Indian market.

Comparison with River Sand

RIVER SAND

SLAG SAND

AN ECO-FRIENDLY ALTERNATIVE TO RIVER SAND

A non-metallic product, consisting of glass containing silicates and alumina silicates of lime, is a by-product of metal smelting processes, produced under controlled conditions. It does not contain any materials that may affect the strength and durability of concrete, such as chlorides, organic matter, clay, silt, and shells.

BUYERS OF SAND

Institutional Buyers

EPC contractors, Ready Mix Manufacturers

Retail Buyers

Masons, Contractors, Builder, IHBs

ADVANTAGES OF SLAG SAND

Durable structure

**Environmental-friendly
alternative**

**Graded products to
meet specific needs**

**No deleterious
material**

**Controlled physical &
chemical properties**

**Available
throughout the year**

**Suitable for roads, concrete, plaster,
mortars, RMC plants etc**

Applications

PLASTERING

FLYOVERS

AIRPORT
RUNWAYS

BUILDINGS

HIGHWAYS

BUILDING BLOCKS
